

Ductor is a global biotech company that is changing the world through groundbreaking innovation, design, and the circular economy. Our ambition is to fight climate change, produce renewable energy, and solve the increasing food demand and waste accumulations challenges. Ductor was founded in 2009 in Helsinki, Finland. Today we operate globally in North America, Europe, and Asia. Our headquarter is based in Zug, Switzerland. One day we'll be everywhere. That is what we do. That is why we are here, come and join us.

As Ductor's business expands and installed equipment base grows, we are looking for an experienced

Head of Plant Operations and Maintenance (O&M)

to join our international team in Zug, Switzerland. Post-commissioning and operating period services will be an essential part of Ductor's business and, as the Head of O&M, you will be responsible for defining and implementing our plant operations, maintenance and spare part business concept. Additionally, development and maintenance of related competencies and processes will also fall within the role's responsibilities.

More specifically, this is a new and interesting position, and as a Head of O&M your main ambition will be to define and implement this new service business concept of Ductor. You will be guided and assisted in this task by the company's top management and regional organizations. As owner of O&M business concept, you understand the importance of various post-commissioning businesses to companies' revenue and profit generation. You have been previously managing and developing O&M business for process facilities or power plants.

We are looking for an experienced, business driven O&M business professional with relevant technical or business studies. The understanding of service business and its role in a company is in your backbone!

We require you to have:

- A Bachelor's degree (or higher) from a technical or business field of studies
- Proven track-record in managing and growing a profitable service business
- Result driven, open-minded and target-oriented attitude as part of your DNA
- Good technical understanding and hands-on approach
- Readiness to travel internationally
- Very good command of both written and spoken English

We consider as an asset:

- Previous experience from process or power industries
- Proficiency in Finnish

Ductor can offer you:

A versatile and interesting assignment in a growing company, where you will be able make your mark in the development of the company. Besides offering versatility and something of great interest, Ductor offers you a truly meaningful assignment in the fight against climate change; you will get to be in the frontline to solve global challenges with interesting products and motivating and knowledgeable team. Moreover, Ductor offers you a truly international working environment, where international travel may be required up to 20 % of your time. Last but certainly not least, Ductor offers you countless of opportunities to learn, develop and grow.

Attracted? If so, we look forward to receiving your complete application by e-mail. Jo Kneubühler from Team-Kader AG is your contact person und guarantees you total discretion.
